EDUCATION: University of Illinois at Chicago | *Bachelor of Science* in Computer Science, Minor in Linguistics May 2019

WORK EXPERIENCE:

CNA Insurance, Software Engineer II

April 2023 – Present

- Designed and deployed ILAP, a cloud-based web application for underwriters, using React, JavaScript, Java, and Spring.
- Built scalable microservices and integrated APIs, improving interoperability and reducing redundancy across platforms.
- Authored and maintained API documentation using Postman, alongside extensive Confluence resources to streamline onboarding and troubleshooting.
- Integrated SonarQube into CI/CD pipelines, performing penetration testing and maintaining 97%+ JUnit test coverage, ensuring secure and robust code.
- Spearheaded production deployments with zero defects and 100% uptime during business hours.
- Led migration from Concourse to GitHub Actions, reducing deployment cycles by 25% and improving team productivity.
- Collaborated as a liaison with the Data Lake team, resolving data integration challenges and ensuring compatibility with enterprise standards.

CNA Insurance, Software Engineer and Intern Manager

April 2021 – March 2023

- Developed a Restaurant segment for an existing web application, generating \$4M in new premium within months.
- Improved API integration, increasing digital activity by 300%, and authored knowledge transfer documentation on Confluence.
- Designed and executed a curriculum for technology interns, earning a 98% satisfaction rating.
- Served as a key recruiter and mentor, conducting interviews, onboarding new hires, and providing ongoing support for their professional development by transitioning to a managerial role for summer interns.

CNA Insurance, Associate Software Engineer

June 2019 – March 2021

- Developed and maintained RESTful APIs using Java, Kotlin, and Spring Boot, contributing \$10M in profits for commercial insurance exchanges.
- Automated testing pipelines with Concourse, achieving 99% code coverage and improving development efficiency.
- Wrote for CNA's technology newsletter, fostering internal knowledge-sharing and collaboration.

CDW Corporation, Application Developer Intern

June 2017 – August 2017

- Improved efficiency of Java applications using Code Analysis Tools (CAST), increasing code quality by multiple letter grades.
- Refactored legacy Java code into a modern REST API, improving maintainability and usability.

UIC Computer Science Course: Program Design, Undergraduate Teaching Assistant

January 2017 – May 2019

- Lead lab sections and held tutoring office hours to help students understand basics of computer science and challenges they had with their programs. Saw grade improvements of office hour attendees as the weeks progressed.

TECHNICAL SKILLS

- Languages: Java, Kotlin, Spring Boot, JavaScript, React, SQL, C++, Python
- Technologies: Google Cloud, GitHub, Gitlab, Postman, Swagger, SonarQube,, Jira, IntelliJ, Visual Studio, Mockito

PROJECTS

- Diabetes Tracker: Developed an Android app to assist diabetes patients with habit tracking.
- The Automatic Foodie: Created a Bluetooth-enabled automated food dispenser using Arduino.

EXTRACURRICULAR/ LEADERSHIP ACTIVITIES:

Muslim Women in Technology, Co-founder

June 2018– Present

- Founded a 501(c)(3) nonprofit supporting underrepresented women in tech.
- Organized 20+ tech talks featuring leaders from Google, Meta, and startups, and partnered with Latinas in Tech and General Assembly.
- Spoke at industry panels and events to advocate for diversity and inclusion in technology, emphasizing the importance of community building.

Break Through Tech, Mentor

June 2020– Present

- Conducted mock interviews and advised undergraduates on career development and curriculum improvements.

HONORS/AWARDS

White Belt Sigma Certificate – UIC Startup Challenge Winner – GHC 2016 Scholarship Recipient - Think Chicago Selected Student
